

## Instinet's Research and Analytics Transferred to Reuters

December 20, 2001 at 12:00 AM EST

**London and New York** – Reuters Group PLC (RTR.L), the global news, information and technology group, and Instinet Group Incorporated (Nasdaq: INET), the world's largest electronic agency securities broker, announced today that Instinet's Research and Analytics (R&A) product has been transferred to Reuters. The net assets were US\$7.9 million as of 30 September 2001. Reuters Group owns 83% of Instinet.

R&A is an information and analytics service providing real-time and historical data, up-to-the-minute news, and search and screen and other analytical tools. In addition, R&A offers fundamental and comprehensive financial company information including corporate summaries, quarterly and annual financial statements, historical earnings, and financial ratios.

**Tom Glocer**, Reuters Chief Executive, said: "One of my key priorities for the Reuters Group is to make our global scale count in our favour. By transferring these 2,200 R&A users to Reuters and ultimately migrating them to BridgeStation, we will add to our existing 600,000 user base, leverage our investment in Bridge and deliver a high-quality service to Instinet users."

**Doug Atkin**, President and CEO of Instinet, said: "Instinet's professional clients, who have been using R&A for years to enhance their trading strategies and make informed investment decisions, will continue to receive the same high-quality service, market data information, and trading analytics."

"Looking forward, we are very excited by the benefits that this migration of R&A onto the Reuters distribution platform will provide for our clients. As a result of this collaboration, Instinet clients will be able to participate in a much broader service and still benefit from the information currently available through R&A."

**End**
