REUTERS TO SUPPLY DOW JONES ENERGY SERVICES WORLDWIDE

London – Reuters, the global information and news group, will distribute from today the Dow Jones
Energy Service, including both the Oil & Gas and the Power & Gas subsets, over its worldwide
network.

Reuters energy clients will now be able easily and quickly to integrate Dow Jones energy news with
Reuters news services on their screens and to benefit from this powerful combination of the two
leading global news organisations covering energy markets.

Subscribers will also be able to access Dow Jones' 36 electricity indices which will be available
as part of the news packages or as a separate service over Reuters.

Martin Wadhvani, global head of commodities and energy, commented: "This is an important addition
to our range of energy news and data sources. Our clients will significantly benefit from the
combined strength of our two energy news services, which now provide a compelling solution to their
information requirements."

JOHN PARCELL TO LEAVE REUTERS

London – Reuters, the information and news group, announced today that John Parcell, chief executive of Reuters Information and a member of the Reuters Board, has decided to leave the group.

John Parcell, 53, said: "I have given much thought to my future goals and aspirations and have decided that this is a very good time to make a significant change. I have had a rewarding 30 years with Reuters, particularly the most recent period when we built and developed Reuters Information as the company's leading business division. I wish my colleagues every success for the exciting future which awaits them."

Sir Christopher Hogg, Reuters chairman, said: "On the Board's behalf, I would like to pay tribute to the major contribution John Parcell has made to the success of Reuters during his long career with the company. He leaves with the warm wishes of all his colleagues."

Parcell joined Reuters as a journalist in 1969 and held a number of international posts in both Editorial and Marketing functions. In 1990, he became managing director for Reuters UK and Ireland. He joined the main Board in October 1996 with responsibility for Reuters core financial information product lines and took up his present role in January 1999.

Thomas Glocer, president Reuters America, will manage the Information business on a day-to-day basis. He will join the Group Executive, the company's senior management committee. A further announcement will be made shortly.

REUTERS LAUNCHES DEALING 3000

London - Reuters today announced the launch of Dealing 3000, the next generation of Reuters Dealing products. Dealing 3000 brings significant evolutionary enhancements to the current Dealing 2000 core products and offers users greater integration and flexibility through a new platform (NT4), a shared environment and a brand new look and feel.

Key features include a choice of flexible screen layouts that enable traders to tailor the design of their keystations to their specific requirements. For the first time, traders have the ability to integrate core Reuters information services and to run other applications in conjunction with the Dealing 3000 keystation whilst ensuring performance and security are maintained. A new matching panel display allows the trader to focus on a single currency pair, whilst the traditional grid display has been enhanced to allow viewing of up to 20 currencies on one screen. In addition, there is a dedicated display for viewing matching activity. There is a completely new Broadcast facility for easy transmission of text and price information and a total of 26 conversations is possible per keystation where the previous maximum was four.

Marion King, head of Reuters Money Transaction Systems, commented: "Dealing 3000 was developed in response to the stated requirements of our customers and is thus designed to provide enhancements that will bring the greatest benefit to traders. Using state of the art technology, this strong new product offers better value for money as well as more standardised packaging. Beta testing in 10 countries has produced extremely positive feedback from users. We have exciting plans for a range of further enhancements and new products that will embrace new technologies and will develop a broader integrated solution for our customers."

The Dealing 3000 programme takes a phased approach with the first two deliverables, Dealing 3000 Direct and Dealing 3000 Spot Matching, replacing Dealing 2000-1 and Dealing 2000-2 Spot respectively.

Dealing 2000-1

Launched in 1989, Dealing 2000-1 is the world's premier global dealing network. It is a 24-hour, seven-days-a-week conversational service, and at the same time the platform for both spot and forwards Matching. Dealing 2000-1 is the market leader, with over 21,000 user accesses in 113 countries handling around 230,000 conversations per day.

For over 10 years the reliability, security and speed offered by Dealing 2000 has resulted in playing a key role in growing liquidity across the financial markets.

The conversational service has been increasingly used in related FX/ money sectors, for example there are large numbers of bullion and derivative traders actively trading over Dealing 2000-1. Today, this conversational dealing service is estimated to be used for around half the world's foreign exchange trading.

Dealing 2000-2

Launched in 1992, Dealing 2000-2 is an anonymous, electronic price matching system. It offers real-time foreign exchange Spot rates in 33 currency pairs. Prices are pre-screened for credit, so that traders know they can deal on the prices they see. Credit limits are set and maintained by the designated bank staff and can be modified at any time during the trading day. Access to the credit file is password driven and completely confidential.
